STATE UNIVERSITY OF NEW YORK
COMMITTEES ON RESEARCH INVOLVING HUMAN SUBJECTS
Established 1971

RELEASE FORM

Project Title: *(Circle one):*

Adaptive Communication

Native and Non-Native English Speakers' Communication

Communicating with Computers

Walking Around

Principal Investigator: Professor Susan E. Brennnan

Co-Investigators: Profs. Marie Huffman, Gregory Zelinsky; Graduate Students Karla Batres, Katharina Schuhmann, Franco Amati, Xujin (Julia) Zhang

Department: Psychology

Please sign below if you give permission for your audiotaped or videotaped speech to be used for research purposes beyond this study, which may include using it as stimuli played to subjects in another study, sharing it with other language researchers, and contributing it to databases of recorded spoken language such as those released by the Linguistic Data Consortium (http://www.ldc.upenn.edu). Before sharing any of your speech data, we would make sure that that none of the spoken information you provided seems likely to identify you; any such information would be removed from the speech as well as from any text transcript; the speech would be stored without any information about your identity. Such databases are used in by researchers to study language use, as well as in research and development of technology such as computer speech recognition systems. You will not receive any results or direct benefits from research on the stored anonymous data, which may be kept indefinitely. If you sign below, that means you give your permission for this re-use of your data. (You need not sign this release in order to participate in the experiment.)
